

WE LAUNCH OUR 100% NATURAL BIOCOSMETIC LINE

April 18, 2018

The benefits of black garlic do not stay inside, but it is a perfect ingredient to create beneficial products for the skin. That is why we are launching a new line of biocosmetic products, 100% natural and vegan: day cream and repair serum. Both are made with extracts of black garlic and microalgae, so they do not have parabens, synthetic chemicals, organic solvents, artificial flavours, lactose or mineral oils. If you want, you could even eat them.

Day cream antiaging

Do you want to improve the elasticity and luminosity of your skin? This is your cream. In addition, it hydrates and nourishes thanks to its concentration of plant principles. It is composed of concentrated oily extract of dunaliella algae, Ecological Black Garlic Concentrated Fluid Extract (BGCFE), shea butter, mint hydrolate and black cumin oil and has a natural, fresh and very pleasant aroma.

It will help reduce acne, eliminate toxins from your skin, promote the formation of keratin and collagen to achieve a firm skin and uniform pigmentation.

Repair serum antiaging

The antiaging repair serum is composed of concentrated oil extract of dunaliella and spirulina algae, BGCFE and jojoba, hazelnut, argan, macadamia and carrot oils, which provides essential nutrients to the skin.

It has oxygenating and regenerating properties that will reduce skin inflammation, being recommended for sensitive and atopic skin and, above all, after tanning. In addition, it has anti-acne effect, by balancing the sebaceous glands in dry, oily and combination skin, anti-wrinkle effect, thanks to the protective action of hyaluronic acid and prevents the loss of firmness by favoring that the tissues recover their normal state after the efforts.

Advances of the new range

The positive effects of our biocosmetic products can be seen from the first application, since the skin perfectly absorbs the product -with hydrating, nourishing and regenerating capacity-, achieving a silky touch and luminosity.

The antioxidant effect of the active ingredients that make up the cream and the serum prevents the aging of the skin, the appearance of wrinkles, sagging and spots and protects it from contamination, cold and sun rays. How is it possible? Thanks to the concentrated extract of black garlic, which contains many polyphenols and organosulfur compounds, one of the most effective antioxidants that exist. If you did not know it, do not wait any longer to test its effects!

The Biocosmetics line adds to our reference of concentrated extract of organic black garlic and to all the products that we elaborate based on this ingredient, to which we add black onions, microalgae and plant essences, all of them with the objective of getting your wellness. This range has the Organic Certification Seal Bio, Inspecta and V-Label.
